

Onboarding Flow Handbook

Onboarding Flow Handbook

Software Engineer Onboarding 3-Month Flow

Welcome to Our Company!

We're excited to have you on the team! This handbook gives you a quick guide to how things work around here. We hope you feel welcomed, valued, and ready to grow with us.

Month 1: Getting Started

- Read: Company Handbook, Onboarding Guideline, Git Rules
- Setup environment: VS Code, React, Node.js
- Run the project locally
- Learn basic Git commands (clone, branch, commit, push, PR)

Month 2: Learn & Practice

- Read: Technical and Architecture Docs
- Learn: React basics (JSX, props, state)
- Task: Complete a small feature
 - Build follow the Architecture Rules
 - Commit it following Git standards
- Submit PR and receive feedback

Month 3: Contribute & Demo

- Read: Sprint Flow & Team Collaboration Rules
- Follow step-by-step Sprint task guide
- Complete a real use case
- Present your work (demo or walkthrough)
